Have you been given the responsibility of becoming the infection prevention and control (IPC) lead? This accredited course is aimed at ensuring those who are given the responsibility of being the IPC Lead in practice have the knowledge and confidence to carry out the role competently. It provides in depth instruction in areas such as sterilisation processes, working towards best practice and the development of an IPC Folder including a way to structure the required checks and audits throughout the year to ensure compliance with HTM01-05 and Code of Practice. This course is up to date with current guidelines for England and also discusses the requirements Wales, Scotland and Northern Ireland. It contains the latest information in relation to Waste Management based on the updated HTM 07-01 guidelines. This course is suited to nurses, decontamination leads and managers. This course meets the required training for an IPC lead as specified by the Code of Practice Health and Social Care Act 2008.
